

DATA SHEET

D/S Silicone Adhesive Polyimide Tape

H143DS

DESCRIPTION

Polyimide film insulating tape with a double sided silicone adhesive

PROPERTY

Adhesive Type		Silicone
Total Thickness	(μ) (excluding release liner)	95
Backing Thickness	(μ)	25
Elongation at break	%	55
Tensile Strength	(N/25mm)	115
Breakdown Voltage	(KV)	4
Thermal Classification	(°C)	200
Adhesion to Steel	(N/25mm)	6

The data given herewith represent average values and should not be taken to write technical specifications. They are put forward in good faith but are not guaranteed. In particular the Customer should satisfy themselves of the suitability of the product for its intended use.

Storage should be in a dry well ventilated room in their initial packaging with a reasonable constant temperature around 20°C. The product should always be applied to clean, dry surfaces.
